

Julie,

I sent you my original comments on the MWELO Draft after I ran out of time to provide you all of my thoughts. I wanted to make sure you received at least a few of my recommendations. But now I realized that I felt it important to provide additional comments that I feel strongly about and so I took time to write them down so I could forward them to you. I apologize for not including all my comments in one email, but I didn't think I would have time to add my recommendations below.

Naturally Yours,

Living Resources Company
